

FINDING OF NO SIGNIFICANT IMPACT

Marketing Orders for

Chesterfield Menthol Box (TP1), Benson & Hedges 100's Deluxe Box, Chesterfield Menthol Box (TP2), and Chesterfield Menthol Box (TP3)

Manufactured by Philip Morris USA Inc.

The Center for Tobacco Products of the Food and Drug Administration (FDA) has carefully considered the potential environmental impacts of these actions and has concluded that these actions will not have significant effects on the quality of the human environment. Therefore, environmental impact statements are not required.

Philip Morris USA Inc. wishes to introduce four new combusted, filtered cigarettes into interstate commerce for commercial distribution in the United States and submitted to FDA four substantial equivalence reports to obtain marketing orders under the provisions of sections 910 and 905(j) of the Federal Food, Drug, and Cosmetic Act.

The Agency prepared the programmatic environmental assessment (PEA), dated July 23, 2020, in accordance with the Council on Environmental Quality's regulations (40 CFR Part 1500–1508) implementing the National Environmental Policy Act (NEPA) and FDA's NEPA regulations (21 CFR 25.40) to support the finding of no significant impact. The evidence supporting these findings is contained in the attached PEA, which is available to the public upon request.

The PEA evaluates potential environmental effects due to manufacturing, use, and disposal of the new tobacco products. No increased or new types of environmental impacts due to manufacturing the new tobacco products are anticipated. The Agency does not foresee that use of the new tobacco products would result in new or different environmental impacts. The Agency believes that the disposal of the new tobacco products would be the same as the disposal conditions of other combusted, filtered cigarette that are currently marketed in the United States. Therefore, the Agency does not foresee significant adverse impacts to the environment due to the proposed actions as a result of manufacturing, use, and disposal of the new products.
